

Redefining Contract Interiors

HOTEL GOTHAM – MANCHESTER

Hotel Gotham is located at 100 King Street, Manchester in the central conservation area and is housed in one of the city's grandest listed buildings - a former premises of Midland Bank, designed by Edwin Lutyens in 1928 in the Art Deco style of the time.

Everything at Gotham, from its magnificent architecture to timeless décor, is there to ensure all expectations are met for its guests. The team at Gotham believe that luxury is as important as location and history, and that style should complement substance.

Responsible for the interior scheme, Oliver Redfern describes the process, "from the moment I first saw the Ebru town wallpaper I knew it could be perfect for the monotone palette of Gotham. Working closely with SDGC meant the original paper design could be redeveloped for commercial usage making it reality!"

Zoffany, Ebru Town and Country wallpaper design was specially printed on a vinyl base for the 60 guestrooms, providing authentic design in the contract specification needed for this historic project. Sanderson feather cushions and FROne curtains complete the look. Sanderson Design Group Contracts, Carolyn Mitchell is delighted with the end result, "Gotham is a great example of Sanderson Design Group Contract delivering luxurious design and uncompromising performance. We can manufacture to individual client specifications whilst maintaining design integrity".
