

Redefining Contract Interiors

CROWNE PLAZA - NORTHWOOD

Located in 85 acres of the mature woodlands of Northwood Park, Santry, the Crowne Plaza has 204 bedrooms and is located just minutes away from Dublin Airport. A contemporary family friendly airport hotel with an Asian fusion restaurant and bar.

The Harlequin Palmetto design was specially transfer printed onto a panama FR fabric, ensuring curtains were inherently fire retardant. The interior was finished with harlequin Palmetto cushions in the Demoiselle design.

Yvonne Clarke of interior and architecture firm Clarke & Whiteman shares the the creative approach they took, “located in lush parkland, the Crowne Plaza Northwood rooms have been designed to set an ethereal scene with botanical references in a soft warm palette of corals, taupes freshened with a hint of mint green. Sanderson Design Group Contract worked with us to develop the palmetto range into bespoke finishes that suited our specifications. Our Client, Tifco Hotel group were delighted with the results”.

Sanderson Design Group Contracts, Carolyn Mitchell adds “the curtain design is based on a cheese-plant leaf, with drama heightened through the use of a negative print accented with colour, resulting in a shadow effect. The graphic detail dragonfly motif creates a striking effect on the cushions. The design inspiration came from wild foliage, graphic botanicals and delicate flore and fauna. An interior scheme perfect for this location, development to a contract pecification”
